

IOSH Managing Safely Recertification

Course aims

This course has been designed for people who have previously successfully completed the IOSH Managing Safely Course and now require to update and refresh their knowledge in order that they can continue to manage health and safety effectively in their workplaces.

Health and safety legislation is an area that is constantly subject to review and change. The course therefore builds on the knowledge and experience already gained by covering the important changes that have taken place since delegates undertook their previous training.

Course objectives

Upon completion of this course, candidates will be able to :

- Show an enhanced knowledge and awareness of health and safety requirements
- Apply this knowledge to the management of health and safety in their workplace
- Develop control measures to wider areas of risk management
- Carry out effective active and reactive monitoring systems
- Provide further information, instruction and training to their workforce
- Communicate on health and safety issues with superiors, employees, and health and safety professionals with increased confidence

Duration

1 day (Optional 2 days if required); 09.30 - 12.30 then 13.00 - 16.30

Examination

Test paper of 13 questions

Location

At our premises at Stafford Technology Park or provided at company site for a maximum of 10 delegates
