## **Target 100 Testimonial from Designer Contracts**

**Designer Contracts** have been supplying and fitting housebuilders with showhomes, floorcoverings, curtain and furniture packages for years which extends from first time buyer properties to luxury homes and penthouse apartments.

We have a team of over 100 people, ten regional warehouses UK wide each run by a dedicated local team and backed by our own transport fleet. We also have a central warehouse which allows us to keep huge stocks and our own automated cutting machine, as well as an in-house curtain workroom, and this means that it is important that we ensure health and safety is taken seriously especially from a staff welfare/safety point of view. We are focused on giving our total commitment so that our customers also benefit from this.

We have expanded in the past two years opening three more regions and Target 100 the computerised Health and Safety Management System from Business Safety Systems has benefitted us enormously in ensuring we comply with legislation. It is a tool used by all our Regions which helps promote and monitor health and safety. It demonstrates to our staff that we take their health and safety seriously and it assists us when we tender for new business as our customers can have the confidence that all the work we undertake is in line with legal requirements.

I am pleased to say that Our health and safety standards have improved since using Target 100. It has become easier to manage, in particular because of our nationwide locations. We now have a consistent approach to health and safety throughout the Company.

The system is user friendly and the advice and care from the Business Safety Systems team is second to none. Everyone is always willing and helpful.

Everyone knows how tough it can be in business, especially with tighter margins and having to have exceptional customer service standards. This is why I would have no hesitation in recommending Target 100 from Business Safety Systems to any Company who wants to move their business forward and ensure they meet with the legal requirements of health and safety.

GENA SPRAGG

Health and Safety Manager
